

Wireless Elevator Phone vs Landline Elevator Phone

Telephone Landlines are Outdated and Obsolete

The majority of elevator passenger entrapments are caused by power outages. Standard landlines are susceptible to disrupted communications especially in the event of power outages and natural disasters such as hurricanes and earthquakes.

Telephone Landline Elevator Phone

This type of installation is outdated and will cost the building owner more in installation and monthly phone line fees

STEP 1

Elevator Phone

The emergency elevator phone is connected to a telephone landline

STEP 2

Telephone Lines

Calls are transmitted from elevator phone using landline

STEP 3

Monitoring Center

Emergency calls are received and dispatched by 24-hour monitoring center

Wireless Elevator Phone

Cut the cord on elevator phone lines. Go wireless and save 35% or more on monthly phone line fees

If you currently pay for an elevator telephone line you are paying too much.

Our wireless elevator telephone line is easy to install and works with all elevator telephones and monitoring services.
