

# Cellular Phone Line vs Traditional Telephone Landline

## Telephone Landlines are Outdated and Obsolete

The major carriers are no longer required to support traditional landlines. Standard landlines are susceptible to disrupted communications especially in the event of power outages and natural disasters such as hurricanes and earthquakes.

### Telephone Landline Emergency Phone

This type of installation is outdated and will cost the building owner more in installation and monthly phone line fees

Obsolete

## Cellular Phone Lines

Cut the cord on emergency phone lines. Go cellular and save 35% or more on monthly phone line fees

If you currently pay for an emergency telephone line you are paying too much.

Our cellular emergency telephone line is easy to install and works with all emergency telephones and monitoring services.
